

Guidelines for Complex Engineering Problem (CEP) Report

Overview

All students must submit a formal project report documenting their CEP. The report must adhere to the standard **Computer Engineering (CE) Final Year Project (FYP)** template. **Failure to comply with formatting or academic honesty standards will result in a grade of ZERO.**

Report Structure and Content

Chapter 1: Introduction

Minimum Length: 1 Page

- **Motivation:** Explain the rationale behind the project. Why is this problem significant?
- **Aims and Objectives:** Clearly state the primary goal and the specific, measurable steps taken to achieve it.
- **Report Organization:** A brief roadmap explaining what is covered in each subsequent chapter.

Chapter 2: Literature Review

Minimum Length: 2 Pages

- **Research Requirements:** Discuss a minimum of **three (3)** peer-reviewed published works.
- **Recency:** Sources must be published in **2020 or later**.
- **Credibility:** Only academic journals or conference papers are acceptable. Internet blogs, general webpages, and YouTube videos are **not** valid references.
- **Format:** This section must be written in cohesive prose. **Bullet points are strictly prohibited.**

Chapter 3: Project Implementation

- **Component Details:** Comprehensive list and description of hardware/software tools used.
- **Schematic Diagram:** High-resolution technical drawings of the system architecture.
- **System Operation:** A detailed explanation of how the project works, supported by relevant figures and flowcharts.
- **Environmental & Sustainability Analysis:** (1 Page Each) Analyze the project's impact on the environment and its long-term sustainability in a global context.

Chapter 4: Practical Applications

Minimum Length: 1 Page

- Identify real-world scenarios where this engineering solution can be deployed. Discuss the target industry and the value it adds to the end-user.

Chapter 5: Conclusion

Minimum Length: 1 Page

- Summarize the findings, reflect on whether the objectives were met, and suggest potential future enhancements.

Chapter 6: References

- Provide a complete list of all cited works.
- **Format:** Use a standardized citation style (e.g., IEEE or APA) as per the CE FYP template.

Mandatory Compliance [!CAUTION]

Formatting & Originality

Formatting and plagiarism are assessed independently. Any report that deviates from the prescribed template or contains plagiarized content will be rejected immediately and graded as ZERO.
